- * After completion of certificate Course only certificate will be issued.

Brief Report:

The "Introduction to Statistics" certificate course provides a comprehensive introduction to the fundamentals of statistics. It equips students with the basic knowledge and skills required to understand, interpret, and apply statistical concepts in various fields. This report outlines the key components, objectives, and outcomes of the course.

The certificate course aims to provide participants with a foundational understanding of statistics, essential for making informed decisions, conducting research, and interpreting data. This report summarizes the key components of the course, its objectives, and the learning outcomes.

Brief Report:

The Department of Computer Applications was started Certificate Course on 26th June 2022 with the duration of 35 days for 35 hours from 08-08-2022. Dr. K. Mahaboob Basha, Principal of the SML Govt. Degree College inaugurating the course and explain the importance of PHOTOSHOP present scenario. The class was conducted from 9 AM to 10 AM in working days. The valedictory function was held on 08-08-2022. The Principal distributed course completion certificate and appreciated the faculty for successful completion of course. This course very useful for B.COM Gen students to know the basics of PHOTOSHOP and its relation with other sciences and understanding the exploration, excavation methods and conservation techniques. 38 students completed the course and received the certificate course in Computer Fundamentals for the Academic year 2021-22.

Outcomes:

Description: Students will learn the basic concepts and skills required to develop effective graphics for the Web and various business publications. Students will learn the basic tools used in Adobe Photoshop to create and edit images. Students will learn how to optimize images and save images in proper file formats. Students will learn color selection and conversion as it relates to both Web and business publications. Techniques of digital image capture and photo retouching will also be explored. While completing the table below, remember that the individual outcomes you list in the first column should answer this question: What must the learner know and be able to do at the end of the course? Items in the third column should answer the question: How do we know? The second column is where teachers can be most creative; it's for pedagogy. Each rectangle in column one should contain just one outcome; the corresponding rectangles in columns two and three, however, may contain more than one item. Using the code at the end of the matrix, indicate the core competencies being strengthened by the outcomes activities and the assessment tools.

Report :-

FUNDAMENTALS OF COMPUTER

What is Computer?

Computer is an advanced electronic device that takes raw data as input from the user and processes these data under the control of set of instructions (called program) and gives the result (output) and saves output for the future use. It can process both numerical and non-numerical (arithmetic and logical) calculations.

A computer has four functions:

- accepts data Input
- processes data Processing
- produces output Output
- stores results Storage Input (Data):

COMPUTER SYSTEM = HARDWARE + SOFTWARE+ USER

- Hardware = Internal Devices + Peripheral Devices All physical parts of the computer (or everything that we can touch) are known as Hardware.
- Software = Programs Software gives "intelligence" to the computer.
- USER = Person, who operates computer.

Major parts of the Computer Input Devices
